

Perth was one of Scotland's most important medieval royal burghs. Many trade routes met here and ships arrived on high tides from England and the continent. Perth's craftsmen were rich, skilled and influential and the markets flourished. While little of medieval Perth survives above ground, there is still evidence of this important past throughout the city centre.

Discover medieval Perth in the year 1440 through 360° virtual images and fascinating facts. Use this leaflet to find the locations of interpretation panels where you can scan QR codes to discover more online about Perth's story. All are located within easy walking distance of each other in the city centre.
